Structured Trade Finance Solutions

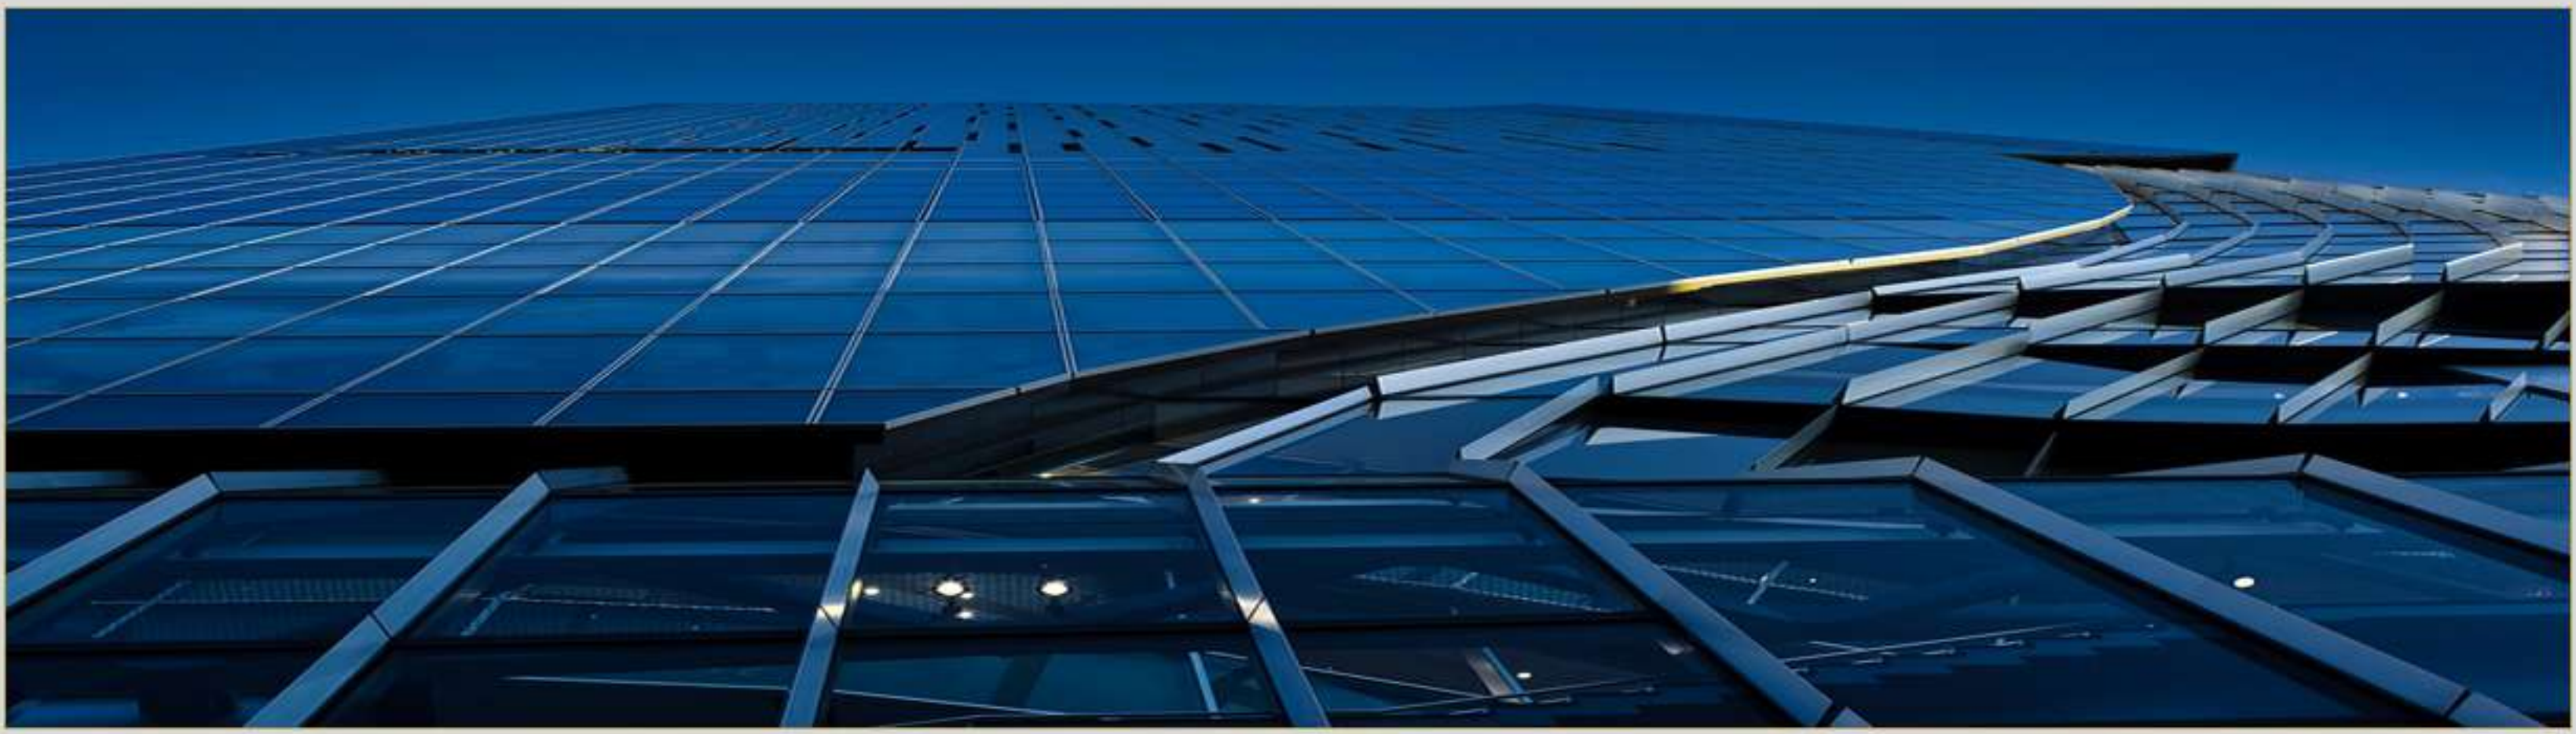

Your high-value commodity flows deserve to be the top priority of Auricoín Bank's Structured Trade Finance Department. You can expect us to be there every step of the way, from inventory to process financing, as well as pre-export application. With easier access to financing terms you can optimise and diversify your financing opportunities while securing strategic acquisitions.

Structured Finance

As the growing economy prompts Auricoín Bank to expand its business support to large financial institutions or companies with complex financing needs, we have no difficulty outgrowing conventional financial products. Political uncertainty in the world could also begin to hamper economic growth, making it even more difficult to obtain financing through traditional borrowing routes, here you find it all, well structured waiting for you. The structured financing offered by Auricoín is the obvious alternative, they are financial instruments that often involve several transactions offered to a single borrower, providing convenience to Auricoín Bank when a significant injection of capital into a company or organisation is required. Auricoín Bank offers a completely different approach to structured financing compared to other institutions, so Auricoín Bank's involvement as a reputable financial services provider provides valuable support in finding the best solution.

Multiple Purpose Financial Institution

The Auricoín Bank is a Multiple Purpose Financial Institution, a special type of financial institution that can provide loans, leasing and factoring operations, as well as act as trustee in certain transactions. The only limitation of an Auricoín Bank at the moment is that they cannot raise funds from the public in Fiat money as a conventional bank can. In addition, Auricoín Bank strictly complies with anti-money laundering purposes; we have the structure, systems, training and internal procedures specific to any transaction. Investors do not encounter any obstacles in the structuring process, thus benefiting from the structure offered by Auricoín Bank, as they are much better than in any other financial place.

Expertise

Auricoín Bank has staff with sufficient knowledge and experience in many Macroeconomic and Financial Areas, and our deepening knowledge will become more and more popular in the World market. Auricoín Bank has come a long way in modernizing and reforming its financial environment in recent years. Since 2018, Auricoín Bank has taken a hard look at traditional banking, to provide a high level of financial support to businesses, with expertise and access to a network of financial products, the likes of which no institution has ever managed to offer in global financial history. Global financial expertise makes us the number one provider of financial services. We offer a professional, proactive and agile approach to help clients maximise business opportunities.
